EXPERIENCE

Amplexor International

Junior Java Developer (2019 - 2021)

- Held the position of Junior Java Developer in the first software development role
- Acquired knowledge and hands-on experience in Scrum methodology, code management, and repositories (commit, push, and review)
- Focused on backend development using Java Spring Boot, with a focus on bug fixing and refactoring
- Gained a comprehensive understanding of the codebase and programming
- Developed a simple JavaFX application that utilized multithreading, used for data migration

Notch

Full-Stack Software Developer (2021 - present)

- Served as the Frontend Lead and successfully guided the team through a central data management application implementation
- Improved frontend skills of team members through hands-on guidance in HTML, CSS, Bootstrap 4, JavaScript, jQuery, and Thymeleaf
- Implemented backend solutions, performed refactoring, wrote tests, and implemented caching
- Improved code quality through identification and resolution of bad coding practices
- Developed project-specific libraries such as automatic HTML generation infrastructure, a Select dropdown wrapper, and a DataTable component
- Utilized annotations in Java Form objects to streamline the generation of HTML and Thymeleaf Forms
